

Teen Issues

Are you sexually active?

- ▶ The medications that you are taking, either Glucophage or Avandia, can cause you to start ovulating again. If you are sexually active you have a greater risk of becoming pregnant.
- ▶ If you are sexually active or thinking about becoming sexually active, please speak with your physician about barrier contraceptives and other means of birth control.
- ▶ If you become pregnant while enrolled in this study, you will be taken off study medications and will be placed on insulin.
